

Don't Let Your Certification Expire!

One of the biggest barriers to renewal is making time to get the needed training for your re-certification, but the Vibration Institute is here to help. We offer outstanding training taught by

world-renown vibration analyst experts with the highest standards of knowledge and competence among professionals in the vibration field today. All Institute courses are taught by Category IV Vibration Analysts who have extensive field and industry experience.

Get a refresh, or take your certification to the next level and get re-certification credits at the same time. Either way, you'll become a better analyst with an edge in an increasingly competitive market place.

Which Course is Best for You?

Vibration Analyst Category	ISO 18436-2 Recommended Experience for Exam Eligibility	Courses Recommended as Partial Preparation for Certification Exams* **						
		IMV	BMV	BRM	MVA	AVC	RDM	AVA
Category I	≥ 6 months	1						
Category II	≥ 18 months		2					
Category III	≥ 3 years			3	4			
Category IV	≥ 5 years					5	6	7

* A candidate is not required to take Vibration Institute courses to sit for a certification exam, however we recommend taking equivalent ISO 18436-3 compliant classes.

** The numbers show the recommended order to take VI courses.
