RE: Annual Training Conference 2017

Vibration Institute Wraps Up Another Highly Successful Training Conference

Oak Brook, IL – 2017 proved to be another highly successful Annual Training Conference for the Vibration Institute. This year's Annual Training Conference took place in Rochester, NY, June 13-16, 2017, at the Hyatt Regency Rochester.

The Vibration Institute's Annual Training Conference has become synonymous with providing top-notch education for attendees, and this year was no different. This year's conference had more than 30 educational tracks featuring topics such as gears, online vibration data collection, shop balancing and much more. Industry experts across many fields of vibration analysis and condition monitoring presented at well attended sessions.

When not attending educational sessions, our more than 270 attendees browsed our exhibit floor, made of 34 booths and 32 exhibitors. From sensors to online data collection, our exhibitors showcased the best products in the industry to key company decision-makers, all while networking.

This year's Annual Training Conference held one additional surprise. Prior to the opening Keynote address, it was announced that VI has formed the Eshleman Foundation, named in honor of Dr. Ron Eshleman, P.E., as the newly formed grant-giving arm of the Vibration Institute.

Be sure to mark your calendar for next year's Annual Training Conference July 17-20, 2018 at the Hyatt Regency New Orleans. Don't miss out!

For more than 40 years, the mission of the Vibration Institute has been to disseminate practical information on evaluating machinery behavior and condition without commercial interest. The Institute offers programs including education, training, certification, and opportunities for exchanging technical knowledge, networking.
