Oak Brook IL, 60523  
RE: Eshleman Foundation

## **Vibration Institute Announces the Eshleman Foundation Online**

This summer, many Vibration Institute board members expressed an interest in giving back to industry to support scholarships for training and memberships for those experiencing hardship or transition in their career. At the same time, there was discussion to find a way to honor Dr. Eshleman for his contributions to the Institute in a lasting way. The culmination of these discussions was the creation of the Eshleman Foundation.

The Eshleman Foundation will become a focal point for elevating the academic research funded by the Institute and will provide vocational training scholarships to advance the machinery condition monitoring industry. Scholarship opportunities include covering training and exam fees as well as registration fees for conference. Special considerations will be given to members or member employees who have volunteered for the Institute or its chapters, unemployed or persons in career transition, and recent returning U.S. military veterans needing a career after service.

On behalf of the Vibration Institute Board of Directors, we would like to personally thank Dr. Eshleman for his contributions to our profession and industry past, present, and in the future.

For more information on the services the foundation will provide or to donate to the scholarship fund, please visit the Eshleman Foundation at [www.vi-eshlemanfoundation.org](http://www.vi-eshlemanfoundation.org). Currently, the Vibration Institute plans to cover all operational expenses for the Foundation, so 100 percent of all donations will go toward covering training, exam, and membership scholarship fees.

If you would like to be a volunteer to help review scholarship applications, please email me at [michael@vi-institute.org](mailto:michael@vi-institute.org).

---

For more than 40 years, the mission of the Vibration Institute has been to disseminate practical information on evaluating machinery behavior and condition without commercial interest. The Institute offers programs including education, training, certification, and opportunities for exchanging technical knowledge, networking.
